PROFESSIONAL SUMMARY

Data Scientist and AI Engineer with hands-on experience in Machine Learning, Deep Learning, NLP, and Data Analytics. Skilled in Python, SQL, Scikit-learn, TensorFlow, and Generative AI concepts including LLMs and RAG. Strong background in Statistics with experience building predictive models and end-to-end AI solutions through internship and academic projects.

Work history:

Data Scientist Intern | SMCS-Psi Data Analytics (OPC) Pvt. Ltd. | Jan 2026-Ongoing (PUNE)

- Working on machine learning and deep learning projects involving data preprocessing, feature engineering, model training, and evaluation.
- Collaborating with team members to improve model performance and optimize workflows.
- Assisting in developing AI-based solutions for real-world business and healthcare problems.

Data Science & AI Consultant | Rubixe | May 2025 – December 2025

- Collaborated with the team members to understand client requirements and business challenges.
- Collaborated with cross-functional teams while demonstrating ownership, accountability, and attention to detail.
- Fulfilled all data science duties for a high-end capital firm.

EDUCATION:

Pune University

Master's degree in Statistics | 2022-2024 | CGPA: 7

Bachelor's degree in Statistics | 2018-2021 | CGPA : 7.3

TECHNICAL SKILLS:

- **Programming & Tools:** Python, SQL, Power BI ,Tableau ,Git, Juypiter notebook, Ms excel
- **Libraries & Frameworks:** NumPy, Pandas, Scikit-learn, TensorFlow, Keras, Matplotlib, Seaborn
- **NLP:** NLTK, SpaCy, Text Classification, Embeddings, LLMs
- **Machine Learning:** Regression, Classification, Clustering, Model Evaluation
- **Deep Learning:** ANN, CNN, DNN, LSTM, RNN, Transfer Learning
- **Time Series:** ARIMA, SARIMA
- **Deployment:** Flask, REST APIs
- **Statistics:** Hypothesis Testing, Regression Analysis, ANOVA, Probability, Statistical Modeling
- **Soft Skills:** Teamwork, Critical thinking, Problem solving, Time management, Quick learner
- **Cloud & Big Data:** Basic AWS, Google Cloud, Apache Spark (Learning)

PROJECTS:

1) Credit Risk Prediction Model

Domain: Finance / Banking

Tools & Technologies: Python, Pandas, NumPy, Scikit-learn, Logistic Regression, Random Forest, XGBoost, EDA

Description:

Developed a machine learning model to predict loan default risk and classify customers as low-risk or high-risk based on financial and demographic features.

2) Retrieval-Augmented Generation (RAG) Question Answering System

Domain: Generative AI / Natural Language Processing

Tools: Python, LangChain, OpenAI/Groq LLM, ChromaDB (Vector Database), Streamlit, Hugging Face Embeddings

Description:

Developed a Retrieval-Augmented Generation (RAG) application that enables users to query documents and receive context-aware answers by combining semantic search with Large Language Models (LLMs).

Key Work:

- Implemented document ingestion, chunking, and preprocessing pipelines.
- Generated vector embeddings and stored them in a vector database for efficient retrieval.
- Built a semantic search mechanism to retrieve relevant document chunks.
- Integrated Large Language Models to generate accurate and context-aware responses.
- Developed a Streamlit-based user interface for document upload and question answering.
- Improved response quality by grounding LLM outputs in retrieved document context.

3) Chest X-Ray Image Classification

Domain: Healthcare / Medical Imaging

Tools: Python, TensorFlow/Keras, CNN, OpenCV, NumPy, Matplotlib

Description:

Developed a Convolutional Neural Network (CNN) model to classify chest X-ray images for disease detection.

Key Work:

- Image preprocessing (resizing, normalization, augmentation)
 - Built CNN architecture with convolution, pooling, dropout layers
 - Trained and validated deep learning model
-

CERTIFICATIONS:

- Certified Data Scientist-**IABAC**
- Artificial Intelligence Expert-**IABAC**
